

SportLomo Free Services for DDSL Clubs

**No monthly or annual fees, clubs get
free setup and support**

DDSL FREE CLUB SERVICES FROM SPORTLOMO

Membership Payments

Accept online payments for club membership.

Event Payments

Collect payments for events such as camps, bus trips, gear, tournaments...

Membership & Event Management

Manage your club's membership and events using SportLoMo's modules.

Pay DDSL and Club membership all in one go

DDSL clubs can now accept online payment for their club membership during league registration. The league registration process will stay the same as last season, but now members can pay the combined club and DDSL fee all at once at the end.

SportLoMo use a “Split Pay” system. This means that Club fees are deposited directly into your club’s bank account, while the DDSL fee is sent directly to the DDSL bank account."

Member Benefits

- One step registration & payment, as a member registers to the League they can conveniently both register and pay their club fees all in the one place.
- A member can register and pay via phone, tablet or desktop.
- Payment receipts are sent out automatically to members by email from the system.
- Members can pay fees in installments (if this is offered by the club).

Club Benefits

- Accept payments for family packages with your own customised pricing.
- Offer installment payments on registration and on family packages if you give discounts based on multiple members in the one family.
- All monies go directly to your club's bank account
- Customise the registration form; collect club information by adding extra questions to the form.
- Include your club's Terms & Conditions in the registration process (and get sign off).
- Offer discount codes.
- In the Events Module, sell summer camps, bus trips, sports gear, tournaments etc. It handles registrations, waiting lists, priority bookings, restrict events to a list of people / general public and more.
- The system produces numerous reports, ideal for real-time reporting on your membership data and bank reconciliation, with the option to export reports to Excel or CSV.

SportLoMo is used to manage 1,500 to 2,000 DDSL games at weekends, involving over 2,900 teams.

Payment Processing Fee

With the support of the League, DDSL clubs are not charged to use the SportLoMo system, however, there is a charge for taking and processing payments. The rate is 3.6% + 70c (inclusive of credit card, stripe fees and VAT).

A club can choose whether to absorb these processing fees or pass them to your members. For example, if you pass the fees to your members, a €100 package will cost the member €104.30, or if you absorb the fees, the member will pay the €100 but the club will receive a lesser amount. There are no additional fees to use the SportLoMo DDSL club services.

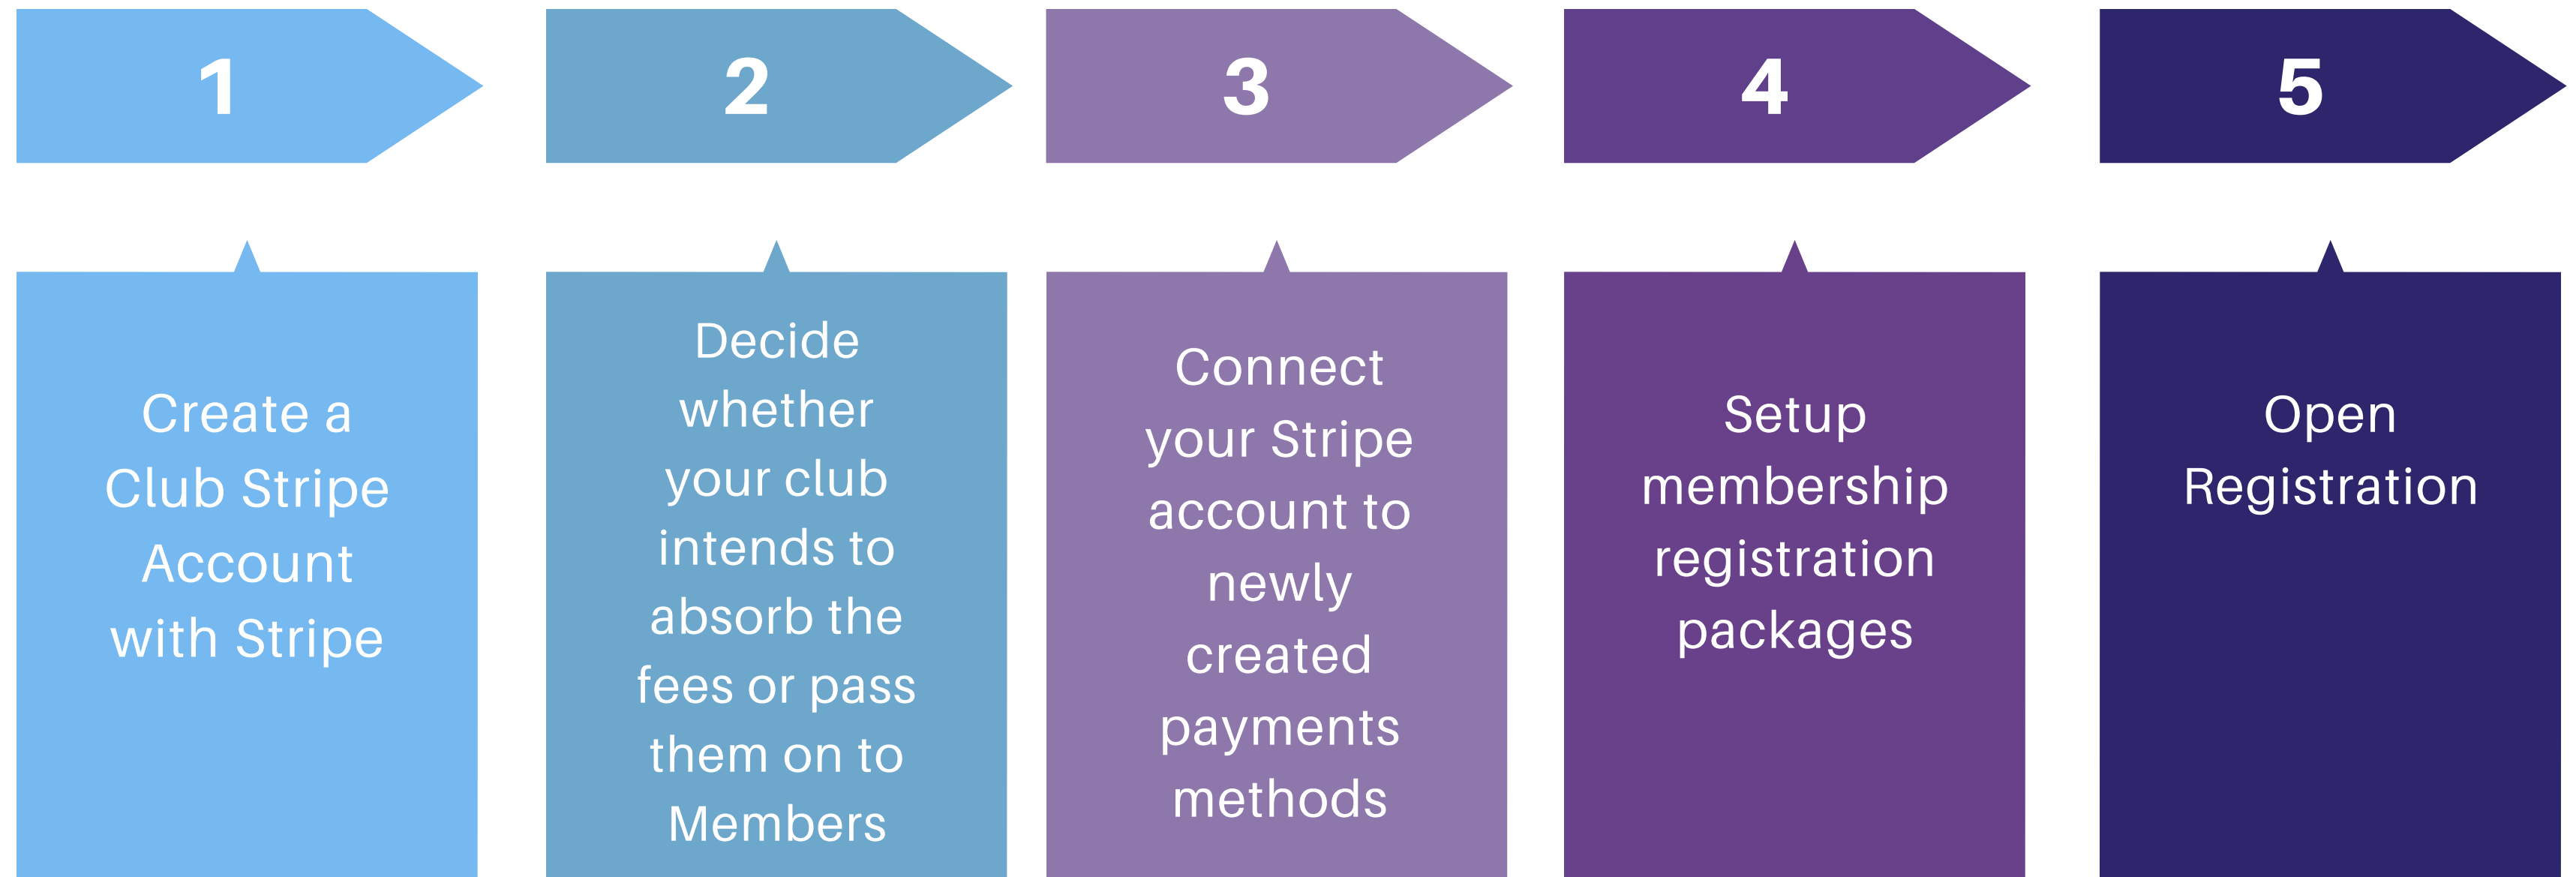

Optional Extra

Get a custom-designed Club Website with a live feed of your club results, fixtures, and tables, from SportLoMo's competition management (additional charge). The DDSL website was designed and developed by SportLoMo.

How does our Club get setup?

A nominal amount of setup is required, but as a DDSL club user, you are already nearly there. You will need a club 'Stripe' account which will be connected to our platform to allow you to take payments. Below are the steps to setup on SportLoMo.

The league and DDSL clubs use SportLoMo's competition management, referee management (app) and collect DDSL registration fees (split pay).

Check out the DDSL players/supporters Scoreboard app (in app store), users can save their 'favourite' club/competitions for quick and easy lookup.
